Mini Motion Studios • @reality._exe • LinkedIn

EXECUTIVE SUMMARY

Award-caliber AI Filmmaker, Showrunner, and Creative Director with 50+ published AI-generated films, dark psychology narratives, and studio-grade vertical micro-dramas produced under Mini Motion Studios. Proven expertise directing multi-episode series universes, locking character facial and costume continuity across 50-reels series bibles, and spearheading the entire generative pipeline: scriptwriting, Google Flow / Kling / Runway multi-shot generation, ElevenLabs multi-speaker voice casting, and DaVinci Resolve post-production. MCA graduate with technical fluency to engineer custom, repeatable AI pipelines for high-retention vertical streaming platforms.

CORE CAPABILITIES & PRODUCTION STACK

AI Video & Directing: Google Flow, Nano Banana, Runway Gen-3, Kling AI, Midjourney, character-consistent LoRA/prompt engineering, ARRI Alexa cinematic lighting & camera motion tokens, 9:16 vertical staging.

Voice & Sound Architecture: ElevenLabs multi-character voice casting & dubbing (English & Hindi), dialogue lip-sync, dramatic orchestral score cueing, Foley SFX, audio-visual tension pacing.

Post-Production & Editing: DaVinci Resolve (color grading, multi-track timeline, sound mastering), CapCut Pro (dynamic subtitles, hook pacing, SFX), visual continuity QC, 4K-to-web encoding.

Storytelling & Research: NotebookLM (lore research & narrative synthesis), Gemini 1.5 Pro, Claude, ChatGPT, 5-arc series bibles, 10-second shot scripts, high-retention hooks.

Audience Analytics & Growth: YouTube Shorts & Instagram Reels retention optimization, vidIQ keyword & outlier modeling, thumbnail A/B testing.

FEATURED STUDIO MICRO-DRAMAS & MAJOR PRODUCTIONS

The Alpha's Fated Mate — 50-Episode Vertical AI Micro-Drama Series

Creator, Director & Showrunner • 2026

• **Series Architecture:** Engineered a comprehensive 5-arc series bible (50 episodes / 300 shots, 9:16 vertical) with hyper-realistic werewolf fantasy world-building, dialogue scripts, and motivated camera blocking.
• **Character Consistency:** Created locked visual prompt definitions across 7+ recurring characters (Ellie Rowan, Gideon Thorne, Darius Vale) with ARRI Alexa 35 cinematic lens directives, maintaining 100% facial and costume continuity.
• **Pipeline Execution:** Deployed Google Flow image-to-video generation, multi-speaker voice synthesis, and DaVinci Resolve/CapCut finishing to produce broadcast-quality 60-second reels ending on high-retention cliffhangers.

Badnaam De Luca — High-Stakes Hindi AI Micro-Drama Series

Creator, Director & Post-Producer • 2026

• **Directorial Vision:** Conceived and directed an original Italian-mafia/revenge Hindi vertical micro-drama series for Mini Motion Studios Hindi, achieving instant viewer engagement.
• **Facial & Scene Locking:** Maintained strict facial identity for Lucas De Luca, Alessia Romano, and Victor Marino across dynamic lighting and intense confrontation sequences.
• **Sound & Pacing:** Directed custom ElevenLabs Hindi voiceovers with emotional dialogue delivery, cinematic tension scores, and DaVinci Resolve color grading.

The Architect & Dark Psychology Universe — Cinematic Flagship Series

Director & AI Filmmaker • Mini Motion Studios

• **Cinematic Storytelling:** Produced flagship anime psychological thriller films and 60-second shorts exploring influence, power dynamics, and tactical psychology.
• **Production Scale:** Maintained consistent character universes (Peter & Lily, Dr. Elias) with signature noir anime visual direction and custom branded outro transitions across 50+ published video assets.

PRODUCTION & STUDIO EXPERIENCE

Founder & Lead AI Filmmaker — Mini Motion Studios

Aug 2026 – Present

Dual YouTube Channels (English & Hindi) • Instagram @reality._exe

- Produced and published 50+ AI-generated films, vertical micro-dramas, and psychological narrative shorts, overseeing every phase from concept to final cut.
- Established rapid batch-production workflows delivering complete 60–90 second narrative episodes (script to final sound edit) in 3–4 hours turnaround.
- Utilized vidIQ analytics and retention curve diagnostics to re-engineer titles, thumbnail hooks, and pacing, driving high viewer completion rates.
- Architected automated creative workflows combining prompt scripting, generative AI engines, and desktop editing suites.
